Projects

Capstone Title: *Russ Clothing*
E-Commerce App for Men's and Womens' Fashion
- Engineered single-page application leveraging React to provide features that include reusable, sign-in/out, and check-out components
- Deployed both Sass and Styled Components in order to accentuate design of application
- Implemented Redux to manage state in a single place and change state on any component across application as necessary
- Synchronized and stored product data on Firebase to create a Back-End and store all data outside of application to increase efficiency and decrease load times
